GO PLACIDLY AMID THE NOISE & HASTE, & REMEMBER WHAT PEACE THERE MAY BE IN SILENCE. AS FAR AS POSSIBLE WITHOUT surrender be on good terms with all persons. Speak your truth quietly & clearly; and listen to others, even the dull & ignorant; they too have their story. Avoid loud & aggressive persons, they are vexations to the spirit. If you compare yourself with others, you may become vain & bitter; for always there will be greater & lesser persons than yourself. Enjoy your achievements as well as your plans. Keep interested in your own career, however humble; it is a real possession in the changing fortunes of time. Exercise caution in your business affairs for the world is full of trickery. But let this not blind you to what virtue there is; many persons strive for high ideals; and everywhere life is full of heroism.

Be yourself. Especially, do not feign affection. Neither be cynical about love; for in the face of all aridity & disenchantment it is perennial as the grass. Take kindly the counsel of the years, gracefully surrendering the things of youth. Nurture strength of spirit to shield you in sudden misfortune. But do not distress yourself with imaginings. Many fears are born of fatigue & loneliness. Beyond a wholesome discipline, be gentle with yourself. You are a child of the universe, no less than the trees & the stars; you have a right to be here. And whether or not it is clear to you, no doubt the universe is unfolding as it should. Therefore be at peace with God, whatever you conceive Him to be, and whatever your labors & aspirations, in the noisy confusion of life keep peace with your soul. With all its sham, drudgery & broken dreams, it is still a beautiful world. Be careful. Strive to be happy.

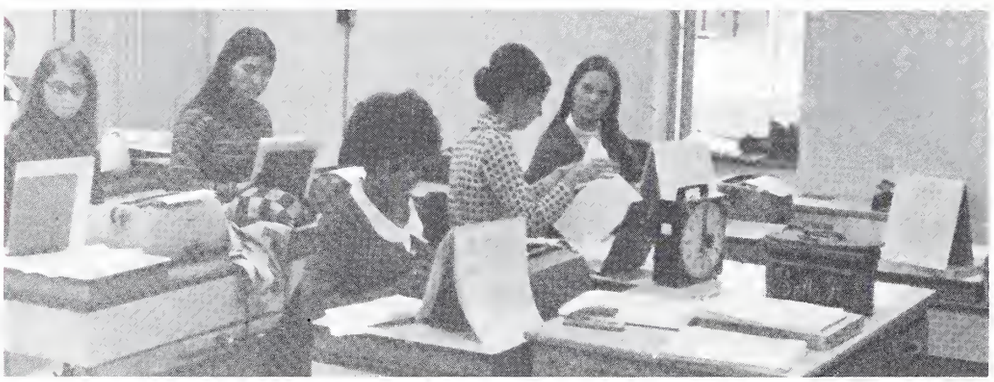
ENJOY YOUR ACHIEVEMENTS AS WELL AS YOUR PLANS



AGRONOMY TECHNOLOGY

Agriculture, like every other area of business and industry, has undergone many revolutionary changes in recent years.

Today's modern farm must be administered by a person well-trained in these up-to-date methods.

In the Agriculture Production Technology the student will be given an adequate background in farm administration with a special emphasis on field crops. He will study the individual crops (such as cotton, soybeans and tobacco) including varieties, adaptations and methods of handling and processing. He will also study soil management, weed and insect control, farm machinery, marketing, and farmstead mechanizations.

In the Agriculture Business Technology the student will be given adequate background in Agriculture-Business areas such as salesmanship, marketing, personnel management, advertising and money and banking as relate to Agricultural related business.

AIR CONDITIONING AND REFRIGERATION

AIR-CONDITIONING, REFRIGERATION AND HEATING

This one-year program leads to a rewarding career in a rapidly growing industry. Today it seems necessary to have air-conditioning in homes, offices, hotels, theaters, and many other buildings. The student receives instruction in theory and practical work in refrigeration and air-conditioning. He studies electrical machinery, mathematics, and other related courses. The fields available to the graduate are sales, planning, installing, operating and maintaining all types of heating, air-conditioning, and refrigeration equipment.

AIRCRAFT

AIRCRAFT MECHANIC

Aircraft Mechanics provides training in the theoretical as well as manual skills in servicing, testing, diagnosing, and rebuilding of both the Airframe and Powerplant units and all related components. All phases of the powerplant fuel and electrical systems, propeller installation and maintenance, airframe, controls and control surfaces, landing gear, rigging, assembly and maintenance, appliances, instruments, radio, aircraft weight and balance, hydraulic systems, and fabric and stressed skin coverings, as well as design and construction of each component will be studied.

AUTO DIESEL

AUTOMOTIVE-DIESEL MECHANIC

This curriculum is designed to develop technicians capable of performing high quality automotive or diesel maintenance work to include diagnosing technical difficulties. Basic scientific principles and technical information are emphasized to give the student an understanding of why mechanical and technical failures occur. Instruction in management and business operation is also included. These related courses provide a broad background, thus qualifying the individual for employment in numerous fields allied to the Automotive or Diesel industry.

BUSINESS ADMINISTRATION

The Business Administration program is designed to give the student knowledge of the four basic requirements for success: Technical Skill, Marketing Know-How, Knowledge of Material Requirements and the "Language of Business."

The student receives training in accounting, economics, psychology, business law, marketing, taxes and insurance, statistics, business organization and management, and basic data processing systems. Upon completion of the training, the student will be prepared for a career in business, industry or government leading top management positions.

CIVIL ENGINEERING TECHNOLOGY

Civil Engineering Technology includes many fields, which although not directly considered civil engineering technology, nevertheless requires a knowledge of Civil Technology and its principles. The work is co-ordinated with many other fields of engineering and is a continously challenging job. The Civil Engineering Technician is a versatile individual. He is a surveyor and a construction man, not only on buildings, but on hydroelectric projects, highway and railroad construction, airports, sewage and water supply systems, and similar projects. The training given in this curriculum will enable the graduate to perform such duties as basic design with both public and private firms. The program also gives instruction in methods and equipment used in heavy engineering types on construction, and consideration of the previsions and practical applications of construction contracts and specification.

DATA PROCESSING

This curriculum introduces the student to the general purpose high speed electronic computer as a versatile and powerful instrument of problem-solving and data processing. The program provides understanding of the concepts, principles and techniques of data processing. The graduate will be an effective programmer of computer equipment and will be able to adapt himself to the various digital computers.

DENTAL ASSISTANT

A dental assistant performs a variety of services necessary to assist a dentist in his office. Her duties will range from office management to chair-side assistance, sterilization of instruments, developing X-Ray film and some laboratory work. She will also deal directly with patients in such things as scheduling of appointments, keeping personal records up-to-date, greeting patients and routing in the dental office. This course provides theory and practice in the basis dental sciences and gives her the opportunity to develop knowledge and skills in a wide variety of activities.

DEVELOPMENTAL STUDIES

Developmental Studies is a specialized program for students whose level of achievement indicates that an individual approach to the attainment of their educational goals is desirable. Students are selected for this program whose high school record, entrance test scores, and information gained by interview would indicate the likelihood of difficulty with the course work associated with the curriculum for which applied.

DRAFTING AND DESIGN

DRAFTING AND DESIGN TECHNOLOGY

The Draftsman-Designer is an essential link between engineering amd manufacturing. His job requires basic engineering knowledge and skill; it is often the means to advancements into positions of greater responsibility.

Instruction includes basic knowledge and principles of Drafting and Design, advancing through Architectural, Mechanical, Civil and Structural.

This curriculum provides drafting room experience supplemented by a planned sequence of related academic subjects. A. graduate of this program will be able to complete a drafting and design assignment of varying complexity with minimum instruction.

INDUSTRIAL ELECTRONICS

The Industrial Electronics curriculum is designed to provide (1) training in the technical and relates sciences such as mathematics, schematic and blueprint interpretation; (2) general training in written and oral communication, and human and industrial relations; (3) specific training in the generation, transmission distribution and utilization of electrical power, electrical-circuit theory and application, electron tubes, basic electronic circuits, instrumentation test equipment, transformer, direct alternating-current machinery, industrial control equipment, and industrial electronic apparatus.

INDUSTRIAL ENGINEERING TECHNOLOGY

The primary purpose of the Industrial Engineering program is to prepare students for positions in the manufacturing industries, leading to supervision and management.

This broad curriculum stresses principles and practices of industrial engineering and industrial management, thereby enabling the graduate to compete for a variety of positions. Industrial Engineering Technicians are found in almost every phase of factory planning and operation such as Plant Layout and Material Handling; Time Study; Cost Control; Manufacturing Processes; and Methods Improvement; technical sales positions, positions which require a knowledge of industrial safety; positions in transportation; distributing, and utilities companies; and also positions in hospitals and in private business.

MACHINE SHOP

The instruction in this curriculum is projected primarily toward the technical aspects of Machine Shop operations. While the student, with the aid of machine and hand tools, is performing selected operations, he is given technical information regarding these operations.

Machine Shop students work in the laboratory on machine and machine tools, including bench work, floor work, assembly layout, selected milling machines, lathe, shaper, drill press and inspection.

MDTA

Manpower Developmental Training Act, was established by the Federal Government to train qualified personnel for office employment.

MDTA is a comprehensive course of Secretarial Science. This course is given in one year, and the primary purpose is to train students for general office procedures such as shorthand, typing, business math, and data processing. At the completion of this course the student is awarded a certificate.

NURSING

The Nursing student develops a comprehensive understanding of the human being, from birth to death, including reactions to emotional, physical and mental stress in health and illness. The emphasis is on principles essential to nursing activities, interpersonal relationships, communication skills, and the courses of illness and disease. Drug theory, nutrition, rehabilitation, and the functions of the medical team are integrated throughout the program. A sequence of supervised clinical experiences is provided to help the student apply nursing principles, increase nursing skills, and improve interpersoanl relationships. Upon satisfactory completion, students are eligible to take the State Board of Nursing examination for registered nurse licensure.

SECRETARIAL SCIENCE

The Secretarial Science curriculum is designed to provide firms with secretarial assistance geared to their individual needs. Three options are available to the student entering this curriculum. A choice may be made in the area of executive, medical, legal or engineering. Upon graduation the secretary enters the field of her specialty. For example, the legal secretary will probably be employed in a law firm, while the medical secretary will be employed in a physicians's office. The engineering secretary may find employment in the areas of civil, electrical, chemical, or mechanical engineering or in a firm of architects. The opportunities for job satisfaction and advancement are unlimited to the individual possessing the necessary qualifications.

TOOL AND DIE

Tool and Die Making is a highly skilled craft requiring a broad knowledge of mathematics, drafting and blueprint reading, physics and science of metallurgy.

The Tool and Die student becomes highly skilled in the use of precision machines and instruments for building intricate mechanisms. Tool and Die Making encompasses the building of tools, jigs and fixtures, dies, gauges, and special productive mechanisms. Knowledge of metallury and the heat treatment of various metals is used extensively by the die maker.

Occupational opportunities include tool and die makers, tool inspectors, methods technicians, foreman, manufacturing process technicians, quality and production control technicians.

IN MEMORIAM

Therefore be at peace with God, whatever you conceive Him to be, and whatever your labors and aspirations, in the noisy confusion of life keep peace with your soul.

Marcus B. Collins

July 15, 1954 — October 11, 1972

EVENING DIVISION

The Evening Division at the Florence-Darlington Technical Education Center is serving the adults of the Pee Dee by offering a broad variety of programs in all occupational areas. The night student is able to receive training which he or she can use immediately. The greater numbers are enrolled in the areas of general programs. These are those programs which include short up-dating and some re-training. Also offered are community interest programs as well as set up tailor-made or special interest programs for industry and business of the Pee Dee. The following are areas in which these courses are offered.

1. Business Division
2. Data Processing
3. Civil Engineering
4. Industrial Area
5. Service Area
6. Air Condition, Refrigeration and Heating
7. Electrical
8. Automotive
9. Pre-TEC
10. Small Business Management
11. Supervisory Development Training
12. Special Programs.

Most students who enroll in these programs have some previous experience in these fields. These programs are 36 hours in length, they meet one night per week for three (3) hours, and cost 12 to 15 dollars per course. The student receives a certificate upon satisfactory completion of the course. The student finds this certificate to be valuable in advancement with his or her employer. They also learn new trade skills which give them an additional tool to increase their earning capacity. Others learn the latest innovations and become up-dated in their occupation. We also offer adult education in the area of the G.E.D.

The Evening Division served over 13,000 students during the 1971-72 school year. Over 500 different classes were taught involving over 1,300 students per week.

The Evening Division offered for the first time Degree and Diploma programs in the evening with registration held early in January 1972. These Technology and Craft programs are designed to offer the student who must work during the day an opportunity to continue his education in the evenings. These programs are V.A. approved and accredited by the Southern Association of Schools and Colleges. Classes of the Technology fields are scheduled to meet for five (5) hours per night for three (3) nights per week, for 15 week terms. Presently we have over 200 students enrolled in these programs.

We are fortunate to have an outstanding staff to administer these programs in the evenings at the Florence-Darlington T.E.C. The Evening Division is headed by Mr. J.C. Hudson with over 15 years of experience in the field of education. He has a B.S. Degree from Clemson University and a Master Degree in administration from Appalachian State University. He is assisted by Mr. Albert Belge with a B.M.E. Degree from R.P.I. and M.S.I.E. from Wayne State and over 20 years of experience in industry, where he has served in management. He also has a number of years experience as a teacher and has done some consulting work. He is a Registered Professional Engineer in South Carolina and in four (4) other states.

The Evening Division has an outstanding staff of secretaries, who are dedicated and work hard to serve the masses of people who attend TEC in the evenings. These are Mrs. Debra Bower, and Mrs. Regina Hulsey, Secretaries to Mr. Hudson. Mrs. Mary Arnold, Financial Secretary; Mrs. Betty Griggs, Receptionist and Records Secretary. Mr. Ray Petty and Mr. Jim Wall, are Counselors to help two nights each for four hours per night with counseling.

We are proud of the Evening Division and its ability to serve the adults of the Pee Dee. Our program is broad in its offering and no matter what your training needs might be, you can find it at the Florence-Darlington T.E.C. in the evenings.

Mr. J. C. Hudson
Dean of Evening Division

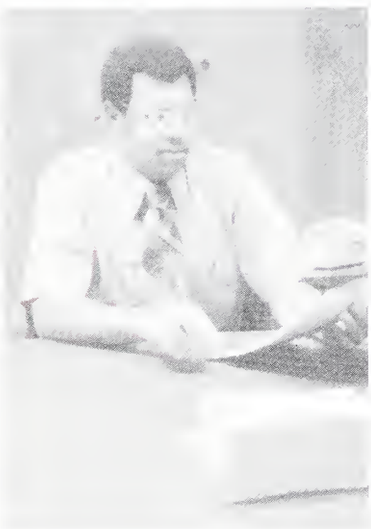
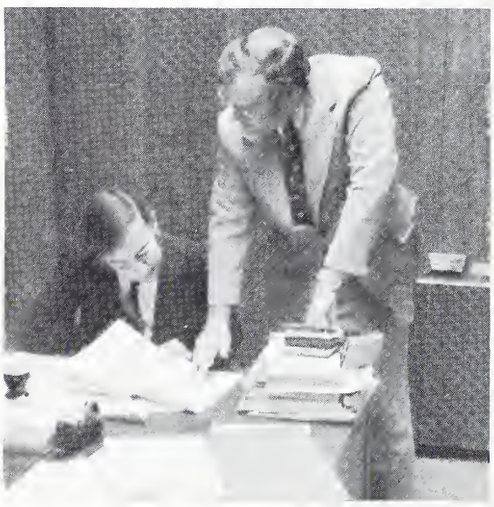
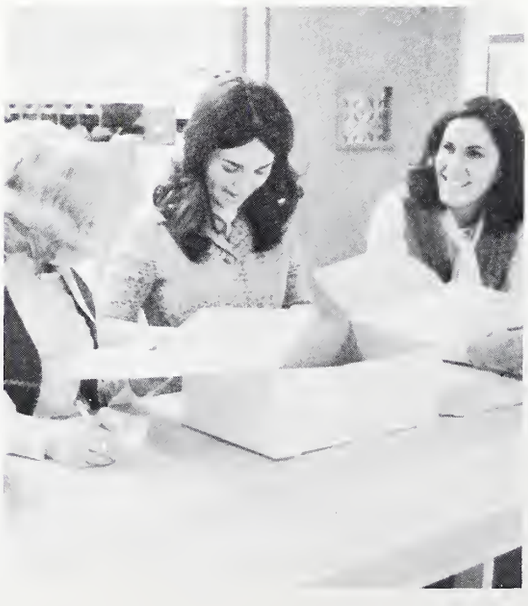
SPECIAL TRIBUTE

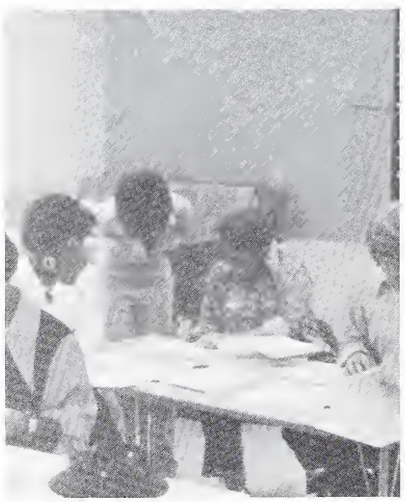
Your personal concern, devoted service, continuing patience, and reassuring faith have been so gratefully appreciated by the Baviere Staff that we take pride in expressing this special tribute to you . . .

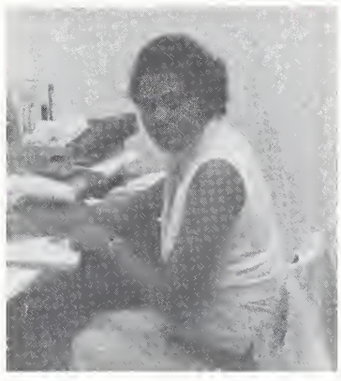
MISS DEBBIE WALL











NURTURE STRENGTH OF SPIRIT
TO SHIELD YOU IN SUDDEN
MISFORTUNE.

BUT DO NOT DISTRESS YOURSELF
WITH IMAGININGS.

MANY FEARS ARE BORN
OF FATIGUE & LONELINESS.

VOLLEYBALL

Volleyball became the biggest and best intramual sport in TEC'S history first quarter when the student government bought materials for three outdoor courts, (including dead grass).

A surprising 24 teams, men and women, exploded into play. A scheduled 120 games were played but the encouragment for the activity came with the unrelenting pick-up play that continued each quarter throughout the year.

It was virtually impossible for students and teachers not to have come in contact with volleyball in some way.

Activity and enjoyment was gained from the well coordinated sport but more importantly so was sportmanship and friendship. "Hey, y'all, let's go play some volleyball."

BASKETBALL

Willis Carter, Elliott Smith, Steve Morganti, Willie Cox, Carnell Pooler, James Montgomery, Ronnie Burley, and Larry Williams.

Florence-Darlington TEC Mens Basketball Team

Florence Darlington TEC has a new ripple this year — a tough, talented basketball team. Since the statewide Technical Education System chose to recognize both intramural and competitive athletics for the first time in its history, the Florence Darlington TEC men's basketball team has been laboring away with the type spirit and pride unsurpassed in student morale. All season the team gave 101% for themselves and the team, but mainly for the school.

A captain was not chosen because all members relied on each other and produced total leadership and desire through team effort.

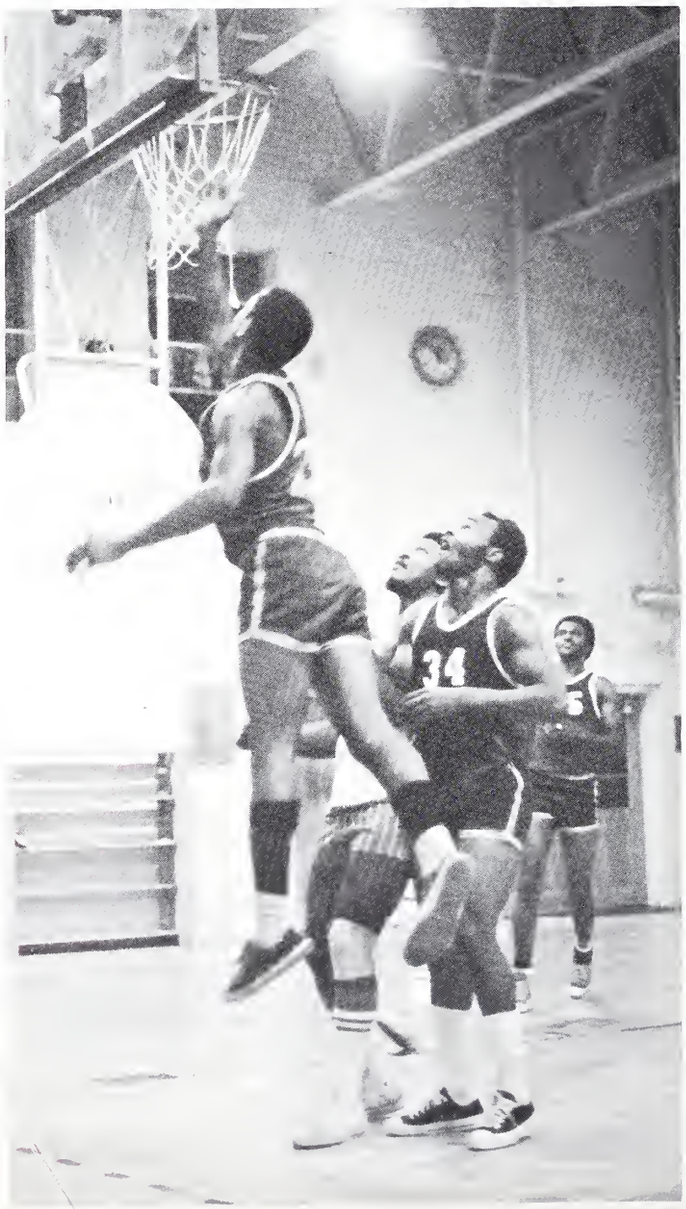
The TEC Center's leading scorer and rebounder was one of the absolute best basketball players in the area — James Montgomery. Proof of this was his 32 point game average and his distinct honors of being the leading scorer of all 16 teams in the league as well as finalist in the one-on-one single man competition.

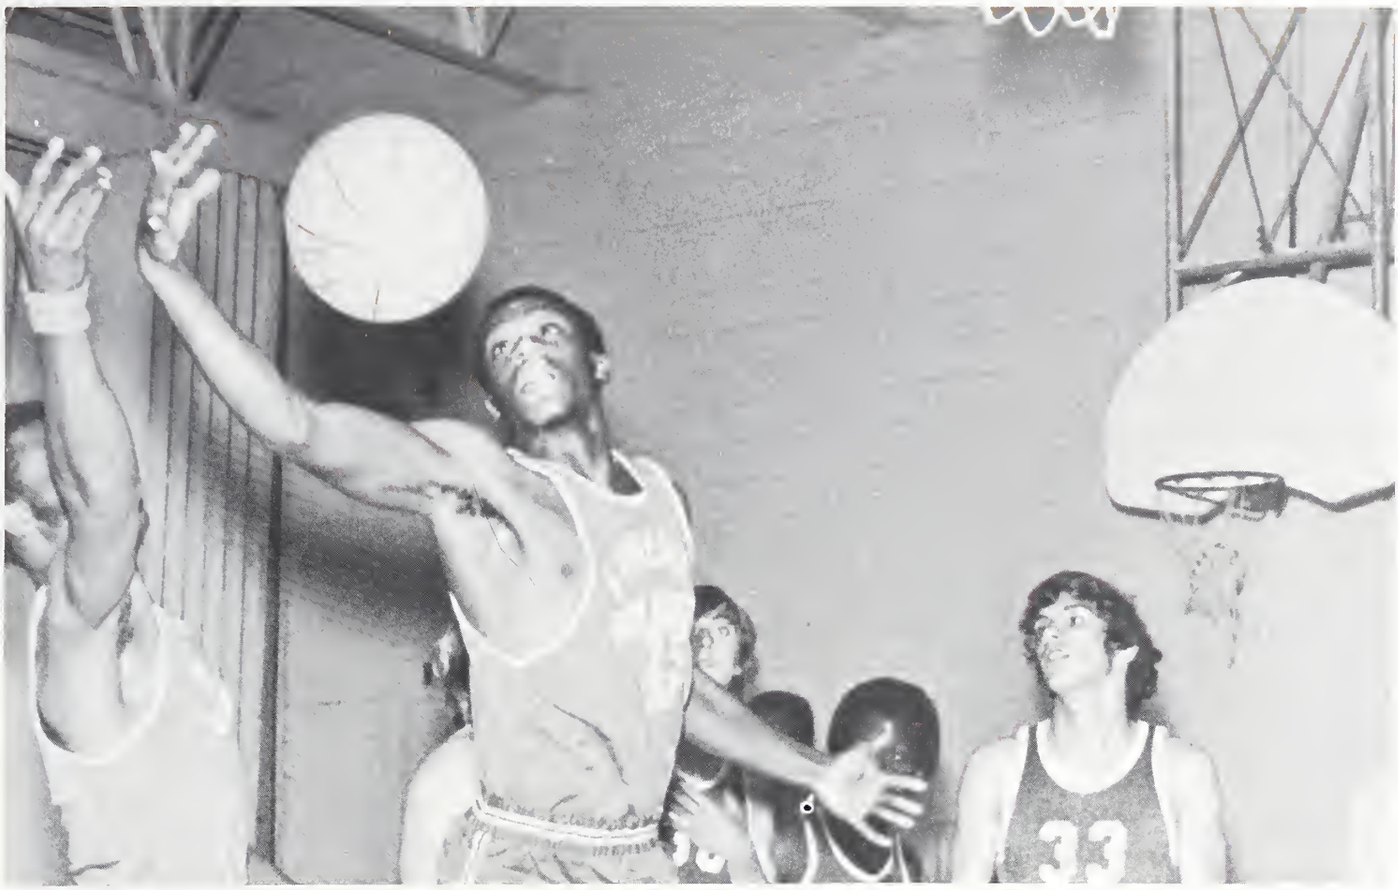
James played as a tyrant, capitalizing on opponents' mistakes which he initiated, but he was flankered by two men whom he could not have done without and whom TEC could not have done without — forwards, Carnell Pooler and Larry Williams.

Carnell showed dominance on rebounds and extreme agility maneuvering inside with deceptive speed for a big man. And Carnell was our big man in every way — going until he was too tired to take another shot and then one more quarter. Larry balanced out the attack beautifully hitting the long ones and out rebounding men twice his size. When Larry was hot, our opponents couldn't stop him with a stick.

Guards Elliott (Smitty) Smith and Willis Carter proved outstanding ball handlers and assets to the team. Willis drove to the basket absolutely ignoring his adversaries with undying courage. Smitty was the team's irreplacable link in the chain of success. Without a doubt Elliott Smith gave more to the team than could ever be noticed from the sideline or recorded in the scoreboard. Smitty was a team player all the way playing superb defense and passing with uncanny accuracy.

Wallace Brockington, Willie Cox, Ronnie Burley and Steve Morganti played a lot of good basketball for TEC alternating at forward or guard with equal adeptness. Wallace and Ronnie's shots and Willie and Steve's rebounds and spirit equaled or surpassed their teamates, gaining invaluable experience to strenghten an undoutably fine team next year.





"A Final Glimpse at Sports"

In 1963 when Florence-Darlington TEC first opened, sports was not thought of as a major student activity, but as time passed it played a more important role in the school. This year we had a good basketball team that was a member of the Florence Men's City League. We had intramural competition in volleyball, both men and women. The sports activities at TEC are on the rise and I think that there will have to be more students participating in order for sports to be an effective activity on campus.

Ken Gunter — Student Body President

Florence-Darlington TEC Student Government

Student representation this year was excellent. Student council members showed an acute interest in their school and its activities. From the beginning the council's goal for the 72-73 school year was involvement; to get the students involved for the betterment of their school and themselves.

We sponsored the usual dances and the annual Christmas float, but this year we tried something a little different — intramural sports.

Volleyball was our first choice and it proved to be a great success with 20-30 students actively participating at any given hour during the school day. Intramural basketball was our next challenge and it proved to be equally rewarding.

The climax of the school year for all students was undoubtedly the opening of the new student center. Once again the student body had a juke box, but this time there were to be no complaints of the volume. In addition to the juke box, pool and table tennis tables were also placed in the lounge for the enjoyment and entertainment of the students.

All in all it has been a very good year with many hours of frustration and hard work exhibited by many, but with the satisfaction that it hasn't been in vain.

TEC TIMES

TEC TIMES is a monthly newspaper edited and published by students interested in journalism. Matters of campus-wide interest, as they affect students, faculty and administration, are reported. Outstanding work by students is published as well as student and faculty opinion on issues confronting the campus community.

CHESS CLUB

The one recurring organization for TEC is the 9-man Chess Club. Growing in number and skill, the club has developed into a competative series of matches between faculty, members and non-members. Stimulated by the recent World Championship, the game and club provides an intellectually challenging outlet for the students in their spare time.

DRAMATIC CLUB

This year was the first ever for the Drama Club here at Florence-Darlington T. E. C. But it was a rewarding experience for me and the other members of the club. I hope in the future more students will support and participate in improving and broadening the club to a large extent. The Drama Club was the first official club or organization to be approved by the Administration at TEC. This year the club sponsored one talent show and three stage plays and hope future Drama Clubs at the center will continue to play an important role in sponsoring talent shows and stage plays. This year the Drama Club was invited to a Drama Workshop and seminar at Coker College in Hartsville, S.C. The first seminar we attended was comedy drama. Interesting thing, there are about ten or more different kinds of comedy. We also attended the Pantomine and it was very witty and funny. The final workshop we attended was movement and over all it was a real experience in being able to participate and seeing these plays done in action.

FUTURE SECRETARIES ASSOCIATION

Recognizing the increasing responsibility of the secretary of the future we resolve to obtain a better understanding of the potentials of the secretary. Here at Florence-Darlington TEC, our FSA chapter proposes to develop desirable work habits and attitudes, and to maintain the highest character and integrity. The FSA is directed by the National Secretaries Association. There are FSA chapters throughout the United States, Puerto Rico, and Canada. Regular monthly programs are being planned to better the understanding of the secretarial responsibilities, and to develop good human relations required for the office.
